INDEX TO VOLUME XLIV.

A

Abel, F. A., gun-cotton, 288.
Academy, American, Proceedings, 296.
notice of, Bentham,
National, Annual of, 295.
August meeting of, 435.
Nat. Sci., Philad., Proceed., 296.
of Arts and Sci., American, notice of, 312.
Acids of the lactic series, *Frankland* and *Duppa*, 268.
Acids, new mixed, *Gal*, 104.
normal and derived, *Barker*, 384.
organic, synthesis of, *Carius*, 256.
Adhesion of vapor, *Gibbs*, 101.
Altitudes in British America, 115.
of Mt. Hood, 429.
of Mt. Washington, 377.
American Association, 16th meeting, 137, 431.
American Naturalist, 139.
Analysis, use of sand and glass filters in quantitative, *Gibbs*, 215.
new method of volumetric, *Gibbs*, 207.
of petroleum, apparatus for, *Peckham*, 230.
Will's tables for quantitative, noticed, 140.
Aral Sea, changes in, *Rawlinson*, 133.
Archæology of Southern France, *Lartet* and *Christy* on, noticed, 119.
Arithmetic, Eaton's, noticed, 140.
Astronomical observatory of Harvard College, annals of, noticed, 293.
Astronomy, Kirkwood's meteoric, noticed, 428.
Norton's, noticed, 295.
Athyris, subdivisions of, *Billings*, 48.
Atomic weights, determination of, by optical means, *Schrauf*, 113.
Atomicities, the theory of, *Gibbs*, 409.
Atoms, chem., existence of, *Kekulé*, 270.
Association, see *American* and *British*.
Australia, tall trees in, 422.

B

Babinet, undulatory theory of heat, 111.
Barker, G. F., formic versus carbonic acid, 263.
normal and derived acids, 384.
Bentham, G., address at the anniversary meeting of the Linnean Soc., May, 1867, 297.
Benzole, etc., action of heat on, *Berthelot*, 266.
Berthelot, action of heat in benzole and analogous hydrocarbons, 266.
Berthelot, hydrocarbons in coal-tar, 418.
Blake, W. P., glaciers of Alaska, 96.
Billings, E., subdivisions of Athyris, 48.
Bost. Nat. Hist. Soc., memoirs, 295.
Proceedings, 144, 296.
conditions and doings, noticed, 437.
Botanical works, noticed.
Boisser, Flora orientalis, 122.
Brunet, Végétaux ligneux du Canada, 122.
Report of International horticultural exhibition and botanical congress, 123.
Moigno, growth of Lycoperdon giganteum, 123.
Gray, Manual, 284.
Andersson, Monographia Salicum, 420.
Martius, Flora Brasiliensis, 421.
De Candolle, Lois de la Nomenclature, 421.
Miquel, affinités de la flora du Japan avec celles de l'Asie et de l'America du Nord, 421.
Annales Musei Botanici Lugduni Batavi, 424.
Brewster's neutral point, 70.
Brines, chemistry of, *Goessmann*, 77.
British Assoc., meeting of, in 1867, 436.
Brodie, B., the new chemical calculus 270.
Brush, G. J., native hydrates of iron, 219.

C

Calculus, new chemical, *Brodie*, 270.
California, subdivisions of the Cretaceous of, *Gabb*, 226; *Conrad*, 376.
Canals between the Atlantic and Pacific, 381.
Candles, and Soap, manufacture of, noticed, 141.
Carbon, adamantine anthracite, 108.
Carbonic acid, versus formic, *Barker*, 263.
Carius, synthesis of organic acids, 256.
Carpenter, W. B., organic nature of Eozoon, 367.
Carstanjen, E., thallic acid, 269.
Chase, P. E., laws of distribution of heat over the earth, 68.
Chase, E. O., skylight polarization in Nebraska, July, 1867, 265.
Chemical calculus, new, *Brodie*, 270.
constitution and crystalline form, relation between, *Dana*, 89, 252.
formulas of the Silicates, 252, 398.
News, Amer. edit., noticed, 294.
Chemistry, *Miller's*, noticed, 295.
of the farm and the sea, by Nichols, noticed, 141.

Clausius R., Mechanical theory of heat with its application to the steam engine, noticed, 437.
Coleoptera, rhynchophorous, *LeConte*, 41.
Colorado, geol. observations in, 284.
Parks of, 351.
Comets, connection with meteors, 128.
Biela's, division of, 130.
III, 1862, elements of, 130.
II, 1867, 130.
Conrad, T. A., reply on the Cretaceous of Cal., 376.
Cooke, J. P., Jr., certain lecture experiments, and a new form of Eudiometer, 189.
on some American chlorites, 201.
determination of protoxyd of iron in silicates, 347.
Copper, precipitation of, by hypophosphorous acid, *Gibbs*, 210.
and nickel, precipitation of, by alkaline carbonates, *Gibbs*, 213.
Cretaceous of Cal., subdivisions of, *Gabb*, 226.
Conrad, in reply to Gabb, 376.
of Iowa, exogenous leaves in, *White*, 119.
Crystallogenic and crystallographic contrib., No. IV, *Dana*, 86, 252, 398.
Crustacean parasitism, *Verrill*, 126.
Currents, marine, of the North circumpolar basin, 383.
Cyanhydric acid, homologues of, *Hofmann*, 416.
Coal-tar, hydrocarbons in, *Berthelot*, 418.
Cyclopedia, American annual, noticed, 140.

D.

Dana, J. D., Crystallogenic and crystallographic contrib., No. IV, 89, 252, 398.
connection between crystalline form and chemical constitution, 89, 252.
on mineralogical nomenclature, 145, 436.
chemical formulas of the silicates, 252.
classification of the elements, 261.
chemical formulas of the feldspars, micas, scapolites, etc., and relation between proportion of silica and alkalies, 398.
Isomorphism of isometric and clinohedral feldspars, 406.
Day, Jeremiah, obituary, 291.
Dawson, J. W., Paleozoic insects, 116.
fossils from the Laurentian, and on Eozoon, 367.
Delesse's hydrographic map of the Department of the Seine, noticed, 143.
Des Cloizeaux, action of heat on crystals, 112.
Drift in S. W. Iowa, *White*, 119.

E.

Earthquake in Kansas, 132.
Encyclopedia, Chambers's, noticed, 144.
Entomological Soc., Philad., 296.
Transactions of, 296.
Eozoon, organic nature of, *Dawson* and *Carpenter*, 367; *King* and *Rowney*, 375.
in Finland, 284.
Essex Institute, Proc., 296.
Eudiometer, a new form of, *Cooke*, 199.
Expansion of metals and alloys by heat, *Mattheissen*, 110.
Exploring expedition to the interior basin, *King*, 118.

F.

Faraday, obituary, 293.
Feuchtwanger's Treatise on gems, noticed, 295.
Formic versus carbonic acid, *Barker*, 263.
Fossils, Secondary, in Oregon, *Blake*, 118.
of Laurentian, 367.
Frankland, acids of the lactic series, 268.

G.

Gabb, W. M., Cretaceous, of Cal., 226.
Gaffield, T., action of sunlight on glass, 244, 316.
Geinitz, on the Upper Paleozoic rocks and fossils of S. E. Nebraska, review of, *Meek*, 170, 282, 327.
Gems, Feuchtwanger's Treatise, noticed, 295.
Geographie ancienne et moderne, dictionnaire de, noticed, 382.
Geographical notices, 377.
Soc., of London, Jour., noticed, 381.
Geographisches Jahrbuch, 1866, noticed, 382.
GEOLOGICAL WORKS, noticed.
Lesquereux, Tertiary plants of Miss., 121.
White's Report on Iowa, 121,
Delesse and Lapparent's Revue de Géologie, 122.
Houghton, Manual, 121.
Packard's Glacial phenomena of Labrador and Maine, 117.
Woodward's British fossil Crustacea, 116.
Hall's Paleontology of N. Y., 142, 275.
Geology of Iowa, *White*, 23.
Kansas, *Hayden*, 32.
Colorado, 284.
Nebraska, 284.
Gibbs, W., chemical and physical abstracts, 101, 265, 416.
on a method of volumetric analysis, 207.
precipitation of copper by hypophosphorous acid, 210.
precipitation of copper and nickel by alkaline carbonates, 213.
employment of sand and glass filters in analysis, 215.
estimation of manganese as pyrophosphate, 216,
the theory of atomicities, 409.
Glaciers of Alaska, *Blake*, 96.
Glass, action of sunlight on, *Gaffield*, 244, 316.
Goessmann, C. A., chemistry of brines, 77.
Gold-mining District, Grass Valley, *Silliman*, 236.

Graphitoidal silicon, crystallization of, 108.
Gray, A., botanical abstracts, 122, 420.
Gun-cotton, *Abel*, 288.

H.

Haidinger, meteor of Knyahinga, 131.
Hall, Notes on geology of Minn., 144.
Paleontology, of N. Y., by, noticed, 142, 275.
Hand, morphology of, *Wilder*, 44.
Hayden, F. V., geology of Kansas, 32.
Hayes, E., obituary, 139.
Heat, action of, on crystals, *Des Cloizeaux*, 112.
distribution of, over the earth, *Chase*, 68.
mechanical theory of, with its application to the steam engine by Clausius, noticed, 437.
undulatory theory of, *Babinet*, 111.
Heights, see *Altitudes*.
Hennessy on distribution of temperature, noticed, 438.
Hinrichs, G., physical notices by, 110.
Hofmann, A. W., a new class of homologues of cyanhydric acid, 416.
Hood, Mt., in Oregon, ascent of, 429.
Hyatt, parallelism between the stages of life in the Tetrabranchiates, 124.
Hydracids, action of, upon ethers, *Gal*, 103.
Hydrocarbons, *Berthelot*, 266, 418.
Hyposulphites, new test for, *Lea*, 222.

I.

Indian Summer, *Willet*, 340.
Indium, 110.
Insects, Paleozoic, in Nova Scotia and New Brunswick, *Dawson*. 116.
Iowa, geology of, *White*, 23.
Iron, native hydrates of, *Brush*, 219.
Isomorphism of leucite and other feldspars, *Dana*, 406.
Itacolumite, *Wetherill*, 61.

K.

Kansas, geology of, *Hayden*, 32.
Kekulé, A., Professor, 137.
existence of chem. atoms, 270.
King, on Eozoon, 375.
Kirkwood, D., meteor of July, 1867, 288.
Meteoric Astronomy, noticed, 428.
Knowlton, W. J., new mineral from Rockport, Mass., 224.

L.

Laboratory, the, noticed, 144.
Land of the globe, maps of northernmost noticed, 383.
Lapham, destruction of forest trees, 424.
Lartet's Archæology of Southern France, noticed, 119.
Laurentian of Canada, fossils from, *Dawson*, 367.
Lawrence Scient. School Laboratory Contrib., No. 3, 207; No. 4, 224.
Lea, M. C., a theory of photo-chemistry, 71.
new test for hyposulphites, 222.
Le Conte, J. L., rhynchophorous coleoptera, 41.
Lippincott's vapor index, 139.
Littrow, v. Carl, Sternschnuppen und Kometen, noticed, 429.
Lyceum Nat. Hist. N. Y., Annals, 296.

M.

Magnetism, secular varieties of terrestrial, *Raulin*, noticed, 143.
Malden's Island, 383.
Manganese, action of peroxyd of, on uric acid, *Wheeler*, 218.
Manganese as pyrophosphate, *Gibbs*, 216.
Manganic peroxyd, action on uric acids, *Wheeler*, 110.
Map, hydrographic, of the Department of the Seine, *Delesse*, noticed, 143.
of arctic, noticed, 383.
Marignac, fluosalts of antimony and arsenic, 102.
Marsh, O. C., new genus of fossil sponges, 88.
contributions to the mineralogy of Nova Scotia, No. 1, 362.
Matthiessen, A., expansion of metals and alloys by heat, 110.
McDonald, M., apparatus for collecting and washing precipitates in test tubes, 188.
Meek, F. B., on Geinitz's views on the Paleozoic of S. E. Nebraska, 170, 282, 327.
the genus Palæacis, Haime, 419.
Meteorites, origin of, *Graham*, 109.
Meteors, see *Shooting stars*.
Meteor of Knyahinga, *Haidinger*, 131.
Météorologiques de Bruxelles, noticed, 144.
Miller, W. H., crystallization of graphitoidal silicon, 108.
Chemistry, noticed, 295.
Mineralogical nomenclature, No. 1, *Dana*, 145, 436.
MINERALS—
Chlorite, American, *Cooke*, 201; Corundophilite, *Dana*, 258, *Des Cloizeaux*, 283; Cyrtolite, *Knowlton*, 224; Diamond, *Wetherill*, 61, *Silliman*, 119; Ekebergite, *Dana*, 403; Feldspars, chem. formula of, *Dana*, 398; Gmelinite, *Marsh*, 362; Grothite, *Dana*, 258; Ledererite, *Marsh*, 362; Leucite, *Dana*, 406; Leucophane, *Dana*, 405; Limonite, *Brush*, 219; Melinophane, *Dana*, 405; micas, *Dana*, 403; Margarite, *Des Cloizeaux*, 283; Œllacherite, *Dana*, 256; Partzite, *Blake*, 119; Petalite, 405; Scapolite, *Dana*, 403; Turgite, *Brush*, *Rodman*, 219; Wernerite, *Dana*, 403.
Mineralogy of Nova Scotia, No. 1, *Marsh*, 362.
Moon-crater Linné, 130.
Morphology of human hand, *Wilder*, 44.
Mulder, G. J., Die Chemie der austro chenden Oele, etc., noticed, 438.
Museum of Comparative Zool., report, noticed, 141.
Music, harmony in, *Poole*, 1.

N.

Nebraska, geol., survey of, 284.
Neutral point, Brewster's, *Chase*, 70.
Newton, H. A., astronomical abstracts, 127, 287, 424.
shooting stars of Aug., 1867, 426.
New York, notice of Paleontology of, *Hall*, 142, 275.
Nomenclature, mineralogical, No. I, *Dana*, 145, 436.
Norton's Astronomy, noticed, 295.

O.

Observatorio dell Collegio Romano, 143.
OBITUARY—
Day, Jeremiah, 291.
Faraday, 293.
Hayes, Ezekiel, 139.
Pelouze, Theophile Jules, 137.
Pickett, E. J., 292.
Oils, drying of, *Mulder*, 438.
Organisms, living, observations and experiment on, in heated water, *Wyman*, 152.
Ozone, density of, *Regnault*, 108.
Palæacis, Haime, *Meek, Verrill*, 419.
Paleontology, see GEOLOGY.
Parasitism, Crustacean, *Verrill*, 126.
Parks of Colorado, 351.
Peckham, S. F., apparatus for analysis of petroleum, 230.
Pelouze, T. J., obituary, 137.
Perfumery, art of, noticed, 141.
Petroleum, apparatus for analysis of, *Peckham*, 230.
Photo-chemistry, theory of, *Lea*, 71.
Pickett, E. J., obituary, 292.
Planets, discovery of, *Watson*, 426.
Plants of Cal., dried, 123.
Poisons, Wormley's micro-chemistry of, noticed, 140.
Poole, H. W., harmony in music, 1.
Precipitates, apparatus for collecting and washing, in test tubes, *McDonald*, 188.

R.

Railroad, between the Atlantic and Pacific, 381.
Raulin, V., secular variations of terrestrial magnetism, noticed, 143.
Rawlinson, H. C., changes in the Aral Sea, 133.
Rodman, C. S., analyses of turgite, 219.
Russian America, geography of, 379.

S

Schrauf, A., determination of atomic weights by optical means, 113.
Schwabe, on Sun spots, etc., 287.
Secchi's L'Unita delle Forze, noticed, 143.
Shades and Shadows, Warren's problems in, noticed, 139.
Sheffield Laboratory contrib., No. XV, 219.
Shooting stars, Nov. orbit of, *Adams*, 127.
connection with comets, 128.
of May, 1866, 129; of July 1867, Kirkwood, 288.
Aug., 1867, *Newton*, 426.
fall of, June 19, 1866, *Haidinger*, 131.
in the southern hemisphere, 429.
treatise on, *Kirkwood*, noticed, 428.
Silicates, chemical formulas of, *Dana*, 252, 398.
determination of protoxyd of iron in, *Cooke*, 347.
Silicon, graphitoidal, crystallization of, *Miller*, 108.
new compounds of, 105.
Silliman, B., Grass Valley Gold-mining District, 236.
Sitka, scientific party for, 291.
Skylight polarization in Nebraska, *Chase*, 265.
Sponges, new genus from the Lower Silurian, *Marsh*, 88.
Smithsonian Institute, history of, *Benthan*, 305.
Soap and Candles, manufacture of, noticed, 141.
Summer, Indian, *Willet*, 340.
Sunlight, action of, on glass, *Gaffield*, 244, 316.
Sunspots, and other solar phenomena, *Schwabe*, 287.

T

Tapir, young, *Verrill*, 126.
Thallic acid, *Carstanjen*, 269.
Trees, tall, in Australia, 422.

V

Vapor, adhesion of, *Gibbs*, 101.
Vapor Index, Lippincott's, 139.
Verrill, A. E., on Radiates in the Museum of Yale College, and on some new species, 125.
Echinoderms of Panama, and western America, 125.
Cretaceous parasitism, young of the Central American Tapir, 120.

W

Warren, S. E., shades and shadows, noticed 139.
Washington, Mt., height of, 377.
Watson, discovery of planets, 426.
Wetherill, C. M., on itacolumite, 61.
Wheeler, C. G., action of peroxyd of manganese on uric acid, 218.
White, C. A., geology of Iowa, 23.
Wilder, B. G., morphology of the hand, 44.
Will's qualitative analysis tables, noticed, 140.
Wormley's Micro-chemistry of poisons, noticed, 140.
Wyman, J., observations and experiments on living organisms in heated water, 152.

Z

ZOOLOGICAL WORKS, noticed—
Packard, Invertebrate fauna, of Labrador, 117.
Hyatt, Molluscous order Tetrabranchiata, 124.
Verrill, Radiata in Museum of Yale College, 125.
Bischoff, on Gorrilla, Chimpansé and Orang-outang, noticed, 142.
Record of Zool. literature for 1865, 144.
Gray, Synopsis of the Starfishes in the British Museum, 426.
